## RICH STRIKE IN

Sensational Rock Encountered in Face of the Steamboat Tunnel Workings.

#### MANAGEMENT IS CAUTIOUS

BIG COTTONWOOD CO., ADJOIN-ING, HAS IT BIG, ALSO.

Ore carrying 40 per cent copper and have just been made, also, in the properties of the Big Cottonwood Gold & strike, more than to acknowl-

some good-looking stuff, but better suc- going to advocate the passage of a had happened at the Mountain Lake. It seems that just as the men were quitting work to take their Christmas vacation a round of holes was fired in the face of the tunnel, and when the smoke had cleared away it was found that one corner of the drift disclosed the ore. A eigar box full of the rock was gathered up in order that it might be taken out and showed to Uncle Jesse Knight, president and general manager of the company, at Provo. Not a tap has been done in the tunnel since, so it is not yet known what the strike is going to amount to. It was expected that the men would get back to the mine to resume work yesterday, so farther details may be expected B. F. Grant, the company's Salt Lake representative, was asked for information ecocarning the strike last evening, and he said:

#### Striket Is Verified.

"I have just returned from Provo, and can verify the news that rich ore was struck, but what the strike will amount to no one can say as yet. The rock was tested for copper and found solidated company is making the fur to carry 40 per cent of that metal. fly," said Mr. Glockner. "It looks like Free gold was to be seen in the ore, and business to see the army of men that is Mr. Knight sent the samples brought being employed at the new smelter and down to the assayer at the Beck Tun- millsite doing things. Materials of all mines in Tintic for for mal assay. I expect to learn within and buildings for the accommodation a day or two just what the gold and of everybody employed are rapidly silver values in the rock are, and then

I shall be pleased to let you know.

point where the one made its appearance, the ground was highly mineralized with iron and some little copper. but it is about 400 feet from where it is expected to cut: the big contact ledge, and no strike was anticipated. Several stringers and small cross-fissures have been encountered in run- to say that no one need worry over ning the tunnel, and there is a strong what is going to happen at Ely. Not fissure on the surface at a point that a day goes by without important news would correspond with the point coming from some property or another. reached by the tunuel, 1,000 feet beneath the surface. Mr. Knight was It is unnecessary. The best buyers and anxious that too much reliance should the best supporters of stocks in Ely not be placed in what this strike may companies are Ely people, and before amount to. He does not wish to conceal real news concerning the condition direct wire connection with New York of the property, but he considers it too early to make claims for this disclosure. It may prove to be nothing more than a streak or a small pocket of

ore and, until more is known concerning it, he considers it folly for any one to become excited."

Ore Region Being Entered.

The fact remains that the tunnel's face has now entered territory where surface work has demonstrated that splendid cross-fissures make for the great contact, which is more than 200 feet wide, both in the Mountain Lake and Big Cottonwood company's ground, as well. That much was acknowledged both by Mr. Grant for the Mountain Lake and Colonel Treweek for the Big Cottonwood companies. And it may just as well be stated now as at any other time, that two of the biggest copper mines in Utah are going to result from development of the great empire of ground owned by the corporations

#### JOSEPH FROM GOLDFIELD. Has a Scheme to Cut "High-Graders'

Off at the Pocket. Harry S. Joseph returned from Goldalso free gold has been encountered in thing things started on his Januaryfield vesterday, where he has been getthe face of the 2,500 -foot Steamboat White Rock lease. He says that a numtunnel of the Mount in Lake Consoli-ber of men are now at work retimberdated Mining comparty at the head of ing the shaft and that nothing can be Big Cottonwood canyon, and it will not hoist and other paraphernalia have be a violation of confidence to say that been shipped to camp, and during the disclosures of the utmost importance month of January he will have things

moving in good shape. "The labor situation," said Mr. Joseph, "will be amicably adjusted on a Copper compary's ground, adjoining. compromise basis, I am cure. There Manager Nicholas Treweek could not is more worry over it on the outside of be persuaded to say much about the camp than there is there. The leasers are not worrying, for they will be entitled to two days for every day they edge that the tunnel was showing up may lose through strike troubles. I am cess attended the effort to learn what measure in the Nevada legislature similar to one of the kind that I expect to introduce here for the protection of mines having rich ores. My idea is to have a measure passed that will provide a high license for companies or individuals buying, selling and hardling high-grade custom ores. The measure will also provide for the keeping of a record that will show from whom the ore was purchased; where it came from; how it assayed and where it goes for treatment. These records should be open to inspection at all times by parties interested. Something of that kind, I believe, would do away with what is termed 'high-grading' to a large extent."

#### LEE GLOCKNER ON ELY.

Lee Glockner, secretary of the Ely Investment company, is over from Ely on business that will keep him here until tonight, when he leaves for home again. He reports that balmy weather prevails at camp and that everything is on the hum.

"I'll tell you that the Nevada Connearing completion. On the trains going in it is possible to see steam shov-"For thirty or forty feet back of the els, donkey engines, and a world of other kind of stuff passing over the rails, while at the camp itself it requires but a glance to see that Manager Pope Yeatman is rapidly getting every-

thing down to system. "Much could be said about doings at the mines of the camp, but I have not time to discuss the subject. Suffice it and an exchange of our own in opera-tion. This wire service will include Goldfield, as well as Ely, and the proposition is now being attended to by representative men in the east.'

#### FEDERAL PATENTS CLAIMS.

The Federal Mining company, with property in Beaver county, is getting down to genuine business. Application for patent on nine of its claims has just passed the publication period without protest, and the money for the pur-chase of the ground from the government has been paid to the receiver of the land office. This is equivalent to patent, and the company will now go to work in earnest.

At a recent meeting of the directors \$5,000 was set aside for the further development of the ground, and arrange-ments are being completed to get things under way by the 15th of the coming

#### MINING STOCK EXCHANGE.

Barring the disheartening slump in the price of Silver King, the local mining stock market is presenting a strong front. Business is holding good for thhe holiday season and the mines are backing up the prices made on shares representing them. Silver King sold yesterday afternoon at \$12 a share, or on a basis of \$1,800,000 for the mine. Less than twelve months ago the stock was selling for \$50 a share. But Silver King is different from most propositions. The bulk of the stock is closely held and the market has never been bothered by the inside interests, which have, apparently, not cared whether the stock was at \$1 or \$100, so it has absolutely no bearing, nor does it in any way exert an influence on other stocks.

During yesterday's trading, regular and open board calls, a total of 43,450 shares of stock, with a selling value of \$39,081, changed hands, the list of closing quotations and record of sales made being as follows: King Market Holds Strong.

### JUPITER-VINDICATOR DEAL

Company Officials Inclined to Criticise Kearns-Keith Statement.

Secretary J. H. Woodmansee of the Jupiter-Vindicator company, operating at Park City, states that President Oscar Lawrence feels that the statement of Thomas Kearns and David Keith to the effect that they had no idea of taking hold of the property, or rather the manner in which it was said, did the company an injustice

The Herald has simply given the news on the subject as it came. A lo-cal paper published a piece of correspondence from Park City in which it was stated on "rumor" that Messrs. is at the lower terminal of the Continental tramway ready for hauling to the sampler. examination of the property "with a view of becoming interested." They were asked if the report was true, and stated it was not, adding that they had been offered a chance to take over a bond on the property by a creditor of been offered a chance to take over a bond on the property by a creditor of bond on the property by a creditor of the company, if his account was made good. This, they considered, carried carried with it an intimation, at least, that the company did not own the bond that the company did not own the bond with the company did not own th on the ground. Under those conditions

they decided not to touch it. President Lawrence states that the bond held by him was transferred to the company on April 26 last, and Secretary Woodmansee vouches for the correctness of the statement. He says that Messrs. Keith and Kearns pages. that Messrs. Keith and Kearns never examined the mine, and, as the parties named make the same statement, there is no chance for argument there. Mr. Woodmansee states also that the company's bond on the property does not expire until next April; that the mine is producing good ore and that shipments will be made from it at materials of greater frequency than the past. Wo one representating the company, Messrs. Lawrence and Woodmansee state, has ever approached Messrs. Keith and Kearns with overtures of any kind, and as Keith and Kearns have not claimed they did, it is hard to see where any injustice has been done on that score. All there is to the business is that some one tried to make it appear that Keith and Kearns had. examined the mine, and, as the par-ties named make the same statement,

#### NEVADA HILLS STRIKE.

With Exception of Slump in Silver Five Feet of \$400 Ore Opened Up in No. 4 Tunnel.

No. 4 Tunnel.

According to the Fairview News, one of the most important strikes ever made in the Nevada Hills property has just been recorded. The paper says:

"Tunnel No. 5, which is immediately below Tunnel No. 4, has come in with five feet of very rich ore at a depth of 140 feet on the vein; this gives 140 feet of backs, as against 60 feet heretofore developed, and another stope from which hundreds of thousands of dollars will be taken. The average samplings from this new body of high-grade run \$400 per ton, and quite eclipses any body of ore yet broken into in point of tounage that it will yield, and the returns it will send back from the smelter. It is almost absolutely necessary to visit the property and explore the surface of the vein that crops for 1,600 feet in order to readily understand the significance of developing 140 feet of backs there. If it were a milling proposition it would mean millions for the seven men who own 600,000 shares of the Nevada Hills stock, but with the returns that are being had from the class of ore that is being sacked in six different places on this bonanza, it is almost beyond the comprehension of man to realize the amount of wealth that is in evidence.

"It is known that in declaring a 10-cent dividend the management left more than twice that amount intact in the treasury, while there is more than ten cars of ore sacked at the mine and in transit, which will bring returns sufficient to make a \$55,000 dividend look insignificant, as compared with the output that is possible. We must remember that most of this ore has been taken out in exploration and development work." has been taken out in exploration and de-velopment work."

#### EXAMINE SOUTHERN MINES.

Eastern Parties Are Sizing Up Properties in New Camp Near Modena.

Modena, D ec. 26.-J. S. Grow of Salt Lake City arrived here today, accompanied by Dr. C. E. Watkins and Claude Watkins of Boston. Mass., and Erdine Gove of New York City. The party immediately left for the new camp of Indigo, north of left for the new camp of Indigo, north of Modena, for an inspection of the Indigo group of claims, which property, it is stated, will be taken by the Amalgamated Copper Mining company, of which the above gentlemen are officers and stockholders. The Indigo group has been under development for some time and the showing so far made is very flattering. A very good quality of copper and silver ore, carrying small gold values having developed in one shaft, and a very promising vein of carbonate of lead ore having developed in another shaft on this property. veloped in another shaft on this property.

The Finance Mining company, of which
R. C. Lund, jr., is an officer, operating
four miles south of Gold Butte, Nev., has
started in on a campaign of active ex-

ploration of its property,
The Gold Butte Mining company, operat-

of the vein in a shaft nearing the thirty-foot mark, indicates in the minds of the owners that the vein, some forty feet in width, when cross-cut, will not prove dis-

stocks traded in on the Boston exchange yesterday, showing the range of prices and the number of shares sold. Accompanying the report, which is furnished by James A Pellock & Co., is the market letter of Paine, Weber & Co., as follows: Boston. Dec. 27.—Shannon, Osceola, Greene Consolidated and Winona were the strong features today in the property. Greene Consolidated and Winona were the strong features today in our market, the former especially being well bought right up to the close. North Butte was strong during most of the session, but toward the close weakened to 10½ on the fear of more tight money. Buying orders in Royale came from New York and the present movement looks like manipulation and we would take advantage of present price to liquidate the stock. Our

#### FAIRLY BUOYANT FEELING

OUTLOOK FOR MONEY MUCH BETTER.

New York, Dec. 27—The supply of stocks offering in the market today was scanty and the demand, though not notably large, was sufficient to lift prices. Where the buying was in any considerable volume or at all urgent in character, the advance in prices was fairly buoyant. The absence of any pressure to sell stocks was the most distinct characteristic of the day's market and it was this that gave it the dull and strong tone. In spite of the

sence of any pressure to sell stocks was the most distinct characteristic of the day's market and it was this that gave it the dull and strong tone. In spite of the near approach of the January settlements and a higher range for call loans than was secured yesterday there was no sign of necessitous liquidation. Borrowers were able apparently to secure facilities at the rates asked and were willing to pay them and there was no forcing of holdings on the market.

The resumption of trading in the London stock market after the holidays seemed to be in favor of higher prices for Americans, as considerable advances were scored there before trading began here. The responsive opening here in fact proved more inviting to holders of stocks that theer was considerable selling to realize and a setback in prices. The reproved so inviting to holders of stocks that there was considerable selling to recent depression in the market. All the transcontinental railroads were strongly bought. There also was a decided upward movement in Reading. There was a growth of confidence in the money outlook. At. C. Line 4s. 97¼ N. Y. C. gen. 92¾ B. & Ohio 4s. 101½ B. & Ohio 3½s. 93¼ N. J. The Gold Butte Mining company, operating at Gold Butte, is said to be reaching out for additional ground and has taken an option on what is known as the Cox group of claims reaching to the Colorado river, and reported to be very promising property.

Work on the Desert Wonder group of claims at Modena is progressing satisfactorily and the indications point to higher gold values. The fact that free gold is being panned fully five feet from the face of the vein in a shaft nearing the thirty-front mark indicates in the raines of the

lowed by a strong closing.
